AIR DRONE ARENA INFLATABLE DRONE CAGE

DESCRIPTION

The Air Drone Arena is a specific innovation designed for the practice of Drone Soccer. It allows UAVs to be initiated into flight mode and demonstrated in a safe environment during indoor or outdoor exhibitions, thanks to the flat-roofed design.

The structure is inflated within 7 minutes and remains pressurized for several days. Lightweight (only 33kg) and easy to fold, it fits into a carry-on bag. An XL ultralight structure is also available for some applications with same functionalities.

TECHNICAL DATA

DIMENSIONS (LxIxH)	6m x 3m x 3m	14m x 7m x 5m
TOTAL WEIGHT	33 kg	130 kg
INFLATION TIME	15min (preparation included)	1h (preparation included)
DEFLATION TIME	15min (folding included)	45min (folding included)
PACK SIZE (LxIxH)	80L x 60l x 60H cm	142L x 112l x 105H cm
FABRICS	M1 fabric	M1 fabric, 600 deniers
COLORS	Anthracite grey, white	Gris anthracite

TESTIMONIAL

« We chose this arena because we needed a safe environment in which to develop our aerial drones. Indeed, our professional drone pilot training centres need to operate in an aviary in certain cases, such as demonstrations or machine presentations, in order to protect the public and the airspace if necessary. What's more, our events subsidiary Atra Drone Events uses this Drone Arena for Drone Soccer, and it's exactly what's needed! Lightweight, easy to transport, quick and easy to set up and take down, robust - all the ingredients for successful events! The quality is excellent and the icing on the cake is that it's French ! »
