

CONSTRUCTION SHELTER FOR LARGE SWIMMING POOL

■ DESCRIPTION

Our large pool construction shelter is designed to secure, speed up and optimize your work on large pools or extensive technical areas.

Modular, quick to install and weather-resistant, our solution **adapts to all pool widths up to 17 metres**, both indoors and outdoors. For your construction, renovation or maintenance operations, gain in **efficiency, safety and business continuity**.

■ KEY POINTS & BENEFITS

Fast deployment

Deployed in 2½ hours by 3 people for a 25-metre pool

Disassembled in just 2 hours

Comfort of work

Possibility to ventilate and control temperatures with removable openings

Its captive air technology offers lasting protection without the need for permanent inflation

Weather protection

Respecting deadlines regardless of weather conditions

A dry and clean site, protecting you from rain, wind and dust

Compact and modular

Easy to transport and store (1m³ bag per module)

Support legs adjust to the depth

Its **design** allows you to carry out your work and maintain **confidentiality** without closing your site, and **to continue welcoming the public** during the work (municipal swimming pools, hotels, spas, etc.).

USES

Construction

- Structure installation
- Civil engineering
- Technical installation

Renovation

- Coatings
- Waterproofing
- Equipment

Maintenance

- Occasional interventions
- Cleaning
- Repairs

TECHNICAL DATA

Composed of five modules that can be assembled using waterproof zips, it adapts to all types of collective swimming pools. **Adjustable support legs** are supplied with each structure to provide stability regardless of the depth of the pools (4 heights available).

On request, you can **customize your Construction Shelter** with your company logo.

FOR ONE MODULE

Interior width	15,29 m (max 17m)
External width	18,45 m
Lenght	5,62 m
Height	3,36 m
Compact when folded	85 kg
Wind resistance (with ballast and bracing)	60 km/h

AIR T (SUPPORT LEGS)

	<u>Lateral</u>	<u>Central</u>
HEIGHT 1	2,35 m	2,95 m
HEIGHT 2	4,15 m	4,75 m
HEIGHT 3	4,50 m	5,10 m
HEIGHT 4	4,85 m	5,45 m

2 modules assembled
