Light trucks

ENHANCED TRACTION PERFORMANCE

- Traction tread pattern design helps to force transmitting on the different directions.
- Design with 4 ribs, (3 grooves) provides good balanced void ratio for performances optimization.

NEW RANGE TO SERVE CUSTOMER NEEDS

- New dynamic & modern tread design and renewed sidewall look.
- Improved sidewall rigidity gives better handling and endurance.

ROLLING RESISTANCE & ENVIRONMENT

- Energy saving: new crown technology.

Wet grip

- Good balance between fuel efficiency, wet performance.
- Durability is stabilized, environment respected.

Labelling

C-D	C	B
		73 dB

Benefit from our tyres designed and made in Europe!

Fuel efficiency (from A to E).
Grip on wet road (from A to E).
External rolling noise class (from A to C).
External rolling noise measured value (decibel).
