INTRODUCING THE
MICHELIN® PREMIER® TIRE

SAFE WHEN NEW

SAFE WHEN WORN

It's a new standard in safety: A tire whose tread, instead of simply wearing down, evolves with its rain grooves expanding and new grooves emerging for extra water evacuation and a high-traction compound for increased wet grip. Even when half worn, the MICHELIN® Premier® A/S tire is still safe—thanks to EverGrip™ wet-braking technology. The MICHELIN® Premier® A/S tire still stops shorter on wet roads than leading competitors' brand-new tires.* Bringing multiple performances together with innovative technologies to deliver the total performance all drivers need—that's MICHELIN® Total Performance™. Learn more at michellman.com/premier.

 **MICHELIN®**
Total Performance™

 **MICHELIN**
A better way forward

*All tires eventually wear out and should be replaced. Half worn Premier tires are safe because of EverGrip™ Technology which combines an evolving tread with a high-traction compound for enhanced stopping capabilities. Based on lateral wet braking performance from all-terrain tires versus Goodyear® Assurance® TripleTred™ A/S tires in sizes 225/50R17 (200), and P175/60R16 (200), Bridgestone® Turanza™ Energy Plus in size 215/60R16 (200). Using MICHELIN® Premier® A/S tires in size 225/50R17 (200) and 215/60R16 (200), buffed to 5/32" of tread. Actual on-road results may vary.
