ROADSHOW USA

EXANE BNP PARIBAS

IN A CONTEXT OF EXACERBATED OPERATIONAL DISRUPTIONS SINCE THE BEGINNING OF THE YEAR, THE GROUP REPORTED €6.5BN IN SALES IN Q1, A RISE OF 19%

- In Q1 2022, existing operational disruptions were exacerbated by the systemic impact of the conflict in Ukraine and the resurgence of Covid-19 in China, putting more pressure on already tight supply chains and driving up costs even further.
- In this context, worldwide demand was up in Q1:
 - The PC/LT tire market grew by 2%, dragged down by ongoing disruptions in OE, mainly in Europe, while the RT segment trended upward
 - The Truck tire market expanded by 4% outside China, but plunged a steep 37% in China
 - Specialty markets remained robust in all segments, with strong underlying demand in Mining in a market still limited by supply shortages
 - January and February were dynamic, while March was hard hit by the impact of the conflict in Ukraine and the resurgence of Covid in China, against an unfavorable basis of comparison
- Consolidated sales ended the first quarter at €6.5bn, up 19.0% year-on-year, of which a 3.4% positive currency effect :
 - a 11.9% gain from price increases, designed to offset further costs increases
 - a 1.6% increase from the mix effect, reflecting growth in the 18"+ segment and a favorable OE/RT mix in the Automotive division
 - a 0.5% growth in tire volumes, limited by multiple operational disruptions
 - a 0.8% gain from external growth, mainly from the consolidation of Allopneus.com at the end of 2021
 - a strong 11.9% increase in non-tire sales
- The Group maintains its guidance for 2022 ⁽¹⁾

⁽¹⁾ Barring any increase in systemic impacts, such as deeper supply chain disruptions or tighter restrictions on freedom of movement that could result in a significant drop in the tire markets.

INFLATION AND SUPPLY CHAIN DISRUPTIONS INTENSIFIED IN Q1, PUSHING THE MARKET TO THE LOWER END OF EXPECTATIONS

Geopolitical tensions and a persistent health crisis are further increasing inflation and operational disruptions in 2022

2022

2021

Unpredictable health situation
Still affecting production in several countries and many industries, creating new bottlenecks and additional inflation

Transportation crisis

- Maritime shipping
- Truck drivers

Further increase in costs

- Raw materials
- Logistics services
- Energy inputs

Labor shortages / Increasing social tensions

- The labor shortage has started to ease in North America
- Truck drivers strike in Spain, social unrest in Sri Lanka

Supply disruptions lowered demand, mainly from OEMs, for PC/LT tires and, to a lesser extent, for Truck and Bus tires. Europe was particularly affected in Q1, as was China in March

Global Passenger car/Light truck tire market
(units)

Truck tire market (excluding China)
(units)

SALES GROWTH OF 19% IN Q1 2022
DYNAMIC TIRE PRICING IN A HIGHLY INFLATIONARY ENVIRONMENT
NON-TIRE SALES UP BY 11.9% OR €39M AT CONSTANT EXCHANGE RATES

Analysis of first quarter sales

(in € millions and as a %)

* Deconsolidation of the printing, publishing and marketing businesses associated with Maps & Guides for France (Michelin Editions) on February 1, 2021, and of Solesis on May 28, 2021; consolidation of TechnoBalt on May 1, 2021, and Allo pneus.com on December 30, 2021.

SALES GROWTH IN EVERY SEGMENT RESTRICTED BY OPERATIONAL DISRUPTIONS, DYNAMIC PRICING POLICIES IMPLEMENTED IN ALL NON-INDEXED BUSINESSES

<i>(in € millions)</i>		Q1 2022	Q1 2021	<i>Change</i>
	RS1 sales <i>Volumes</i>	3,254 -	2,694 -	+20.8% <i>+0.2%</i>
	RS2 sales <i>Volumes</i>	1,674 -	1,388 -	+20.6% <i>+2.6%</i>
	RS3 sales <i>Volumes</i>	1,553 -	1,366 -	+13.7% <i>-0.9%</i>

In an environment shaped by strong inflation and significant operational disruptions:

- **RS1:** dynamic pricing management led to strong growth in sales, with OE impacted by the shortage of spare parts, and with strong demand for 18”+ Replacement tires helping to maintain a favorable OE/RT mix.
- **RS2:** strong growth in sales was impelled by responsive pricing management and continued expansion in fleet management solutions, on the back of sustained demand in Europe and the Americas, with a focus on the highest value market segments.
- **RS3:** dynamic pricing management in the non-indexed businesses and higher volumes in most businesses – Beyond Road, Two-wheel, Aircraft, Conveyor Belts – led to growth in sales. Despite easing pressure on the upstream supply chain and an appropriate staffing level, Mining sales were still held back by shipment disruptions in Q1.

CONFLICT IN UKRAINE: MANAGING THE IMPACT

- Michelin condemns unequivocally any violation of international laws. The Group's position is always on the side of its employees, regardless of the nation they called home, and their safety is always the number one priority. Michelin is fully complying with the sanctions that are being adopted by the international community in each country where it operates.
- Group exposure to Ukraine and Russia:
 - About 1,000 people, of which 750 are employed in our plant in Davydovo (less than 2 million Passenger car tires per year, i.e. ~1% of the Group's Automotive tires worldwide capacity); plant operations were suspended mid-March;
 - Around 2% of Group sales (based on 2021);
 - Balance sheet exposure at the end of December 2021: ~€200m, of which €40m in fixed assets⁽¹⁾.
- Impact of the conflict on the Group:
 - Production in Europe: ~3 days on average of monitored shut down;
 - Alternative sourcing activated for raw materials, more particularly carbon black;
 - The conflict has exacerbated already existing disruptions and fueled additional inflation (mainly energy in Europe and transportation).

⁽¹⁾ See section 5.1.11 of the 2021 Universal Registration Document for more details, available on <https://www.michelin.com/en/finance/regulated-information/financial-publications/>

2

2022 GUIDANCE

2022 MARKET SCENARIO: GROWTH EXPECTED AT THE LOWER END OF RANGES, IN A PERSISTENTLY DISRUPTED ENVIRONMENT

PC/LT: +0%/+4%*

- OE: supply difficulties expected to constrain OEM demand, mainly in Europe
- RT: global demand to remain high, without significant inventory rebuilding

PC/LT market forecast (units)

TRUCK excl. China: +3%/+7%*

Truck tires worldwide: +1%/+5%*

- OE: demand outside China expected to keep growing, despite some new supply difficulties
- RT: global demand to remain strong, buoyed by freight demand in every region

Truck market forecast, excluding China (units)

SPECIALTIES: +6%/+10%*

- Mining tires: demand to remain robust, but the health crisis and supply chain disruptions will continue to complicate operations in H1
- Off-the-road tires: growing demand, despite some supply difficulties in OE
- Two-wheel tires: sustained growth
- Aircraft tires: growth in demand from still weak comparatives

*vs. 2021

2022 SCENARIO MAINTAINED

	2022
Volumes	In line with markets
Cost impact of raw materials prices, customs duties, transportation and energy	Strongly negative
Net price-mix / raw materials, manufacturing and logistics performance	Neutral

2022 GUIDANCE MAINTAINED ⁽¹⁾

	2022
Segment operating income at constant exchange rates	> €3,200m
Structural free cash flow ⁽²⁾	> €1,200m

⁽¹⁾ Barring any new systemic effect: deeper supply chain disruptions or tighter restrictions on freedom of movement that would result in a significant drop in the tire markets.

⁽²⁾ Structural free cash flow corresponds to free cash flow before acquisitions, adjusted for the impact of changes in raw material costs on trade payables, trade receivables and inventories (see definition slide 63).

APPENDICES

- **Events to come:**

Return on capital employed

In 2021, the Group continued to deploy its value creation strategy, in line with its 2023-2030 ambitions:

- Improving margins:
 - Margins protected from rising costs with dynamic pricing management
 - Market share gains in 18-inch and larger tires
 - Priority focus on the MICHELIN brand
- Optimizing capital employed:
 - Working capital requirement: disciplined DSO/DPO management, sustained deployment of the inventory reduction strategy
 - Non-current assets: capital expenditure per unit in line with industry benchmarks
- Analysis of ROCE

CAPEX: ~€600/€700M INCREASE IN 2022-2023 TO MAKE UP FOR POSTPONEMENTS AMID THE 2020-2021 CRISIS

Committed and planned capital expenditure ⁽¹⁾ (in € billions)

Key points

Capex stable as a % of sales:

- Investing in growth segments:
 - MICHELIN brand
 - Automotive mix
 - Specialties
- Optimizing routine capex
- Digital manufacturing and competitiveness

Growth in capex:

- Services and Solutions
- Flexible composites
- Increased capex in sustainable materials and to reduce the carbon intensity of operations and product: ~€300m/year
- JV financing (excluding capex)
 - around €50 million/year

⁽¹⁾ Purchases of intangible assets and PP&E

18,6% GEARING AT END-2021

CAPITAL MARKETS DAY, APRIL 8, 2021: RELIVE THE EVENT

A dedicated page has been created for the event on the www.michelin.com website. It features a number of replayable videos that review the day's presentations and offer insight into the following themes, which are going to drive the Group's sustainable growth:

- Michelin's Environmental Leadership: Focus on the Automotive segment
- Industry 4.0: a key lever to improve our industrial efficiency
- Services and Solutions: understanding customer needs and how our products are used enables us to develop and offer high value-added solutions
- High-Tech Materials: leveraging our R&D expertise in materials, to develop new growth avenues
- Metal 3D Printing: a unique offering in a very high-potential market
- Hydrogen: becoming a global player in hydrogen mobility

SUCCESSFUL INTEGRATIONS WITH, AROUND AND BEYOND TIRES

In 2021, the Michelin Connected Fleet brand began consolidating all our fleet Services & Solutions under a single identity, thereby stepping up the pooling of Sascar, Masternaut, NexTraq and Michelin resources and platforms.

The proportion of Tier 2 brands in total output tripled in 2021 to 55%. These brands offer higher value-added than the Tier 3 brands initially produced by Multistrada. The plant's production capacity is continuing to be expanded according to schedule.

From polymer engineering for medical implants to innovative designs in flexible industrial composites, Michelin is demonstrating its ability to successfully grow *beyond tires*.

Pooling sales forces and leveraging the strong fit between Camso and Michelin's offerings have generated additional sales, while reducing selling & administrative costs.

WEAR PARTICLES: MICHELIN HAS A CONSIDERABLE COMPETITIVE ADVANTAGE, WITHOUT COMPROMISING SAFETY

“Low tyre abrasion and safe driving characteristics: Michelin shows how it [should be] done”

(ADAC, Dec. 2021⁽¹⁾)

Particulate emissions: Michelin vs. other premium tiremakers

Source: ADAC, Dec. 2021⁽¹⁾

“The environmental impact of tire abrasion is up to 50% higher for other manufacturers than for Michelin, whose tire technology currently gives them an enormous lead over the competition.”

[Download the ADAC study](#)

Michelin is continuously improving the performance of its products thanks to its unrivaled expertise

Particulate emissions are being reduced with each new range⁽²⁾

TIRE AND ROAD WEAR PARTICLES (TRWP): DEFINITION AND STATE OF KNOWLEDGE

TRWP are tiny debris generated by abrasion from a tire's contact with the road surface.
This abrasion is caused by the tire's grip and keeps the tire safely on the road.

Scientific studies⁽¹⁾ have started to **measure the environmental impact of TRWP:**

AIR
Studies confirm that TRWP account for only a very small proportion (<1%) of particulate matter pollution

WATER
Studies suggest that TRWP sediment and degrade quickly, so that 50% disappear in 16 months

TRWP

5 x 10⁻² mm

- Composition: mixture of rubber and road surface minerals
- High density: 1.8
- Diameter: ~100 μm (100 times smaller than microplastics)

Michelin strongly favors a regulation that would limit the level of wear particles emissions of all tires worldwide. Michelin contributes with the ETRMA⁽²⁾ members to the definition of a standardized test method of TRWP emission rate, to eliminate the least performing tires from the market with a threshold regulation.

(1) For more information about TRWP, [see the following document](#), which cites the studies in question

NATURAL RUBBER: MICHELIN IS STRENGTHENING ITS COMMITMENT TO EFFICIENT, RESPONSIBLE NATURAL RUBBER FARMING

In response to a **fragmented and complex** industry...

Michelin procurement

KEY FIGURES

- ~**90%** of purchased volumes come from smallholders
- >**140** direct suppliers
- UP TO 7** middlemen between direct suppliers and smallholders
- ~**2M** smallholders serve Michelin
- ~**2 HA.** average farm size

...Michelin is strengthening its commitment to a sustainable supply chain

2025 objective: step up sustainability across the industry

- Land rights: more than 95% of identified at-risk supplies apply the principle of free, prior and informed consent.
- Deforestation: more than 95% of identified at-risk supplies apply the zero-deforestation principle.
- Social and environmental risks: more than 70% of procurement volumes are assessed.

Extend assessments of supplier practices across the value chain...

- Direct suppliers via EcoVadis: 94% of volumes assessed at end-2021, of which 79% confirmed as compliant.
- Indirect suppliers via RubberWay: 64% of volumes mapped at end-2021, with a target of 80% in 2022.
- Since 2020, a stronger partnership with WWF for more in-depth analysis of deforestation risks.

...to undertake impactful, real-world projects

- **Brazil** – partnership with WWF: increasing the rubber harvest to have a positive economic impact on 3,800 families in the State of Amazonas, while preserving the forest (6.8 million hectares under management).
- **Indonesia** – partnership with Porsche: improving the skills of 1,000 smallholders identified with the RubberWay™ app.
- **Thailand** – as part of the GPSNR: helping small farmers diversify their sources of income with agroforestry opportunities.
- **Africa** – through SIPH: offering nearly 100,000 farmers a year training in best agricultural practices, workplace health and safety, and environmental issues.

AMBITIONS FOR 2030

BIODIVERSITY

(1) Replacement of pesticides and fertilizers by mechanical methods combined with other alternative solutions

MICHELIN IS PURSUING PROGRAMS TO REDUCE ITS CO₂ EMISSIONS, VOC⁽¹⁾ EMISSIONS AND WATER WITHDRAWALS

In response to supply chain disruptions, the Group occasionally had to resort to more costly workarounds on an as-needed basis, which penalized CO₂ emissions in 2021.

Analysis of externality costs (in € millions)

Definition Scope

- 1 Direct emissions**
sources owned or controlled by the company
- 2 Indirect emissions**
energy purchased by the company
- 3 Indirect emissions**
all other emissions related to the company's business activities and the use of finished products

(1) Volatil Organic Compounds

(2) Including €3m from adjustments in the method of calculating transportation-related CO₂ emissions

(3) Covers only the inbound and outbound transportation and distribution of natural rubber, semi-finished products and finished product

(4) Corresponds to the 2023 target of approximately €300m announced at the CMD on April 8, 2021, adjusted for the ton of CO₂ valued at €100/t and the change in method mentioned in (2)

2030 ENVIRONMENTAL AMBITION: ON THE PATH TO REACH NET ZERO EMISSIONS IN 2050

Level of influence on the activity
Low → High

DIVERSITY AND INCLUSION: PROGRESS ON ALL INDICATORS IN 2021, DEMONSTRATING THE GROUP'S COMMITMENT

IMDI⁽¹⁾

EQUAL OPPORTUNITY

Every employee can develop his/her talents within the company. Michelin pays particular attention to the internal promotion of manufacturing operators.

GENDER BALANCE

Achieve parity among Group executives and, by 2030, set the gender balance benchmark in our industry.

DISABILITY

Michelin offers career paths to people of all abilities according to its talent development policy.

IDENTITY

(All D&I* aspects, e.g., age, sexual orientation, ethnicity, religion, etc.) Enable every person to be who they really are and to bring their authentic selves to work.

* Diversity & Inclusion

MULTI-NATIONAL MANAGEMENT

All our host country nationalities and cultures are represented in all corporate functions in the operating regions and at headquarters, in line with the geographical footprint of each business.

MICHELIN GOUVERNANCE PILLARS: CLEAR SEGREGATION OF DUTIES, DOUBLE CHECK AND BALANCE OVERSIGHT

ESG AWARENESS AND OVERSIGHT ARE FULLY EMBODIED IN MICHELIN'S GOVERNANCE STRUCTURE

SUPERVISORY BOARD - CSR COMMITTEE

STAKEHOLDERS COMMITTEE

At the corporate executive level, a Stakeholders Committee set up in 2016 brings together 12 people representative of the Group's leading stakeholders, including suppliers, investors, unions, customers and NGOs. Four continents are represented on the Committee, which meets with the Executive Committee for a full day at least once per year.

ESG IS MANAGED AT HIGHEST LEVEL BY AN INCENTIVIZED TEAM

ESG incentives

GLOSSARY

Free cash flow (FCF)

Free cash flow, which is stated before dividend payments and financing transactions, corresponds to net cash from operating activities less net cash used in investing activities, adjusted for net cash flows relating to cash management financial assets and borrowing collaterals.

Structural free cash flow

Corresponds to free cash flow before acquisitions, adjusted for the impact of changes in raw materials costs on trade payables, trade receivables and inventories.

ROCE

Return on capital employed is measured as follows:

- net operating profit after tax (NOPAT)⁽¹⁾, calculated at a standard tax rate of 25%, corresponding to the Group's average effective tax rate;
- divided by average economic assets employed during the year ⁽²⁾, i.e., all of the Group's intangible assets, property, plant and equipment, loans and deposits, investments in equity-accounted companies, and net working capital requirement.

Tires sales

Correspond to sales from Michelin's core business, including the Tire as a Service (TaaS) business and Distribution operations.

Non-tire sales

Correspond to sales from the Services and Solutions (excluding TaaS and Distribution), Conveyor Belts and High-Tech Materials businesses, excluding joint ventures.

(1) NOPAT = Segment operating income + amortization of acquired intangible assets + the Group's share of profit from equity-accounted companies.

(2) Average between the opening and closing balance sheets for the year.

Free Cash Flow (FCF)

+ M&A

= Free Cash Flow before M&A

+/- Adjusted for the impact of changes in raw materials costs

= **Structural Free Cash Flow**

DISCLAIMER

"This presentation is not an offer to purchase or a solicitation to recommend the purchase of Michelin shares. To obtain more detailed information on Michelin, please consult the documents filed in France with Autorité des marchés financiers, which are also available from the <http://www.michelin.com/en/> website.
