

15TH ANNUAL INDUSTRIALS & AUTOS WEEK

GOLDMAN SACHS

December 7, 2023

Nine-month sales up 2% to €21.2 billion despite soft volumes and a forex headwind, supported by mix enhancement, non-tire activities and brand leadership

- 9-month 2023 sell-in markets shaped by inventory drawdowns in Europe and North America
 - PC/LT tire markets stable vs. 2022 : robust OE demand in most regions offset slightly negative RT demand dampened by destocking in Europe and the Americas. Demand for 18-inch and larger tires is steadily expanding. Inventory levels are back to normal in most regions except for winter tires in Europe.
 - Truck tire markets outside China dropped 5% due to substantial dealer and B2B fleet inventory reductions. OE demand still robust in Europe and North America. On Replacement markets, destocking expected to be completed by the end of the year.
 - Specialty tire markets dynamic in Mining, Aircraft and OE Agricultural tires, and soft in Construction, RT Agricultural and Two-wheel tires.
 - Non-tire markets up in most segments (fleet services, mining, energy), stable in general industrial applications.
- 9-month sales up 2.0% to €21.2 billion, supported by mix enhancement, non-tire activities and the valorization of our offers. Q3 sales stable excluding the currency effect
 - Tire sales volumes down 3.6%, reflecting market destocking and Group's priority focus on value-accretive segments.
 - Price effect stood at 6.2%, confirming the recognized value of our products and solutions, and the impact of price indexation clauses from 2022.
 - Mix effect reached 1.0%, reflecting growth in the 18-inch and larger Passenger car tire segment and a favorable geo-mix, partially offset by an adverse OE/RT mix across businesses.
 - Non-tire sales up 13% at constant exchange rates, sustainably fueling Group's growth.
 - Negative currency effect reached 2.6% year-to-date, of which -5.5% in Q3
- Growth in polymer composite solutions accelerating with the end-September closing of the FCG acquisition, will drive higher Group sales from Q4 onwards
- 2023 guidance: segment operating income confirmed (> €3.4bn at constant exchange rates), FCF before acquisitions ⁽¹⁾ revised upwards (> €2.3bn)

⁽¹⁾ Definition: see slide 69

Sell-in YTD Oct. markets trending towards the upper part of the range in PC/LT; still in the lower part in Truck

PASSENGER CAR AND LIGHT TRUCK TIRE MARKET

TRUCK TIRE MARKET EXCLUDING CHINA

FY scenario

-1%/1%

FY scenario

-6%/-4%

9-month Group sales up 2.0% to €21.2bn despite weak volumes

Non-tire sales grew by 13% or €134m

ANALYSIS OF SALES

(in € millions and as a % of 9M 2022)

⁽¹⁾ Consolidation of CPS (Conveyor Products & Solutions) effective July 14, 2022, EGC Enterprises (high performance polymers) effective Feb. 3, 2023, Blacksmith effective Apr. 1, 2023.

Q3 Group sales dragged down by FX to €7.1bn, price-mix steering remains solid

Non-tire sales grew by 6% or €23m

ANALYSIS OF SALES

(in € millions and as a % of Q3 2022)

(1) Consolidation of CPS (Conveyor Products & Solutions) effective July 14, 2022; EGC Enterprises (high performance polymers) effective Feb. 3, 2023; Blacksmith effective Apr. 1, 2023.

Automotive and Specialties segments delivering strong performance, Road transportation facing low volumes on decreasing markets

SALES BY REPORTING SEGMENT

(in € millions)

		9M 23	9M 22	CHANGE	
RS1 	Sales	10,611	10,238	+3.6%	<p>Sales growth driven by embedded price effect and sustained product mix enrichment, more than offsetting volume effect of Distribution's destocking. Market share gain in growing 18"+ segment, now accounting for 60% of MICHELIN-branded tire sales in 9M 23, up 5 points vs 9M 22.</p>
	<i>o/w volume change</i>	-	-	-1%	
RS2 	Sales	5,173	5,403	-4.3%	<p>Sales penalized by low volumes mainly from Replacement heavily impacted by destocking in Distribution, and unfavorable OE/RT mix. Positive embedded price effect. Double-digit growth in services to fleets.</p>
	<i>o/w volume change</i>	-	-	-7%	
RS3 	Sales	5,368	5,091	+5.4%	<p>Sales growth driven by embedded price effect and dynamic Aircraft and Mining activities. Unfavorable comparison basis in Mining in H2 due to record-high performance in H2 2022. <i>Beyond Road</i> activities focusing on value-creative segments, weighing on volumes but improving margins. High-tech materials sales up 13%.</p>
	<i>o/w volume change</i>	-	-	-2%	
GROUP	Sales	21,152	20,732	+2.0%	
	<i>o/w volume change</i>	-	-	-3.6%

-6%/-4%

Previously: -4%/-1%

SPECIALTIES

-1%/+1%

Previously: -1%/+2%

Mining tires: strong demand holds, with high comparatives along H2 23

Beyond-road tires: slight growth across OE businesses, while RT turns more negative

Two-wheel tires: decreasing demand on high inventories levels, mainly bicycle

Aircraft tires: growth, with commercial demand recovering pre-covid levels

OE: H1 23 growth to revert in H2 on higher basis of comparison, mainly in China

RT: proved to be more resilient than expected in Q3, mainly in North America

OE: demand remains robust, despite a few supply disruptions

RT: soft *sell-in* demand with some additional destocking actions foreseen in Q4

High-Tech Materials

ZOOM ON 3 MAJORS STEPS

TBC sold its retail activities to increase profitability

- 2018: 50/50 JV set up with Sumitomo Corp
- 2018-23: strong cash generation, with \$400m shareholder loans reimbursed
- 2023: divesting from company-owned retail to focus on wholesale and franchise

Stellantis acquired 33% aside Michelin and Faurecia

- 2019: 50/50 JV set up with Faurecia
- 2023: building up new assembling capacities
 - Giga factory in France (Saint-Fons)
 - 1st production line in the US (California)
 - Saint-Fons capacity: 2026: 50,000 / year
2028: 100,000 / year

Michelin acquired FCG to create a leader in Engineered fabrics & films

- 20% increase of High-tech materials revenues to €1.3bn (FY22 pro-forma)
- Improved Michelin growth profile, margin accretive, positive cash generation and favorable impact on EPS
- Positioning the Group as a key player in polymer composite solutions

Shareholder return policy: pay-out gradually increasing towards 50% target

PER SHARE DATA ⁽¹⁾

(in €)

	2018	2019	2020	2021	2022	Target ⁽⁴⁾ @CMD21
DIVIDEND	0.93	0.50	0.58	1.13	1.25	
NET INCOME BASIC	2.33	2.42	0.88	2.58	2.81	
PAY-OUT RATIO ⁽²⁾	40%	21%	65%	44%	44%	50%
RETURN ⁽³⁾	4.3%	1.8%	2.2%	3.1%	4.8%	

DIVIDEND POLICY

- Payout ratio gradually raised towards 50% in 2030
- Pay-out calculated on reported net income

SHARE BUY-BACK POLICY

- Anti-dilutive programs to offset the impact of employee share plans
- Additional programs might be considered

(1) Data prior to 2022 restated for the 4-for-1 stock split of June 2022

(2) Dividend / Net income

(3) Dividend / Share price; based on Dec 31 closing stock price

OPPORTUNITY TO EXPAND FCG IN NORTH AMERICA

(2022 revenue by geography)

SUPERIOR FINANCIAL PROFILE

Run-rate EBIT synergies of €21m reached by year 5

High single digit revenue growth prospects

EBIT-margin accretive at Group level and for the Specialty segment

Positive cash conversion from lower capital intensity

EPS accretive from year 1

Enhanced People, Profit and Planet performance at the heart of future success

PEOPLE

Access to **more career opportunities**

A leadership model that puts people, **teams and empowerment at the centre of our mindset** and behaviours

Enhanced skills management

Strong **people ambitions**:

- be world-class in employee engagement, with **engagement rate > 85%**
- be world-class in employee safety, with **TCIR < 0.5**

PROFIT

Increase High-Tech Materials revenue by c.20%, with high single digit organic growth prospects

EBIT-margin accretive acquisition for Specialty segment

Positive cash conversion from lower capital intensity

EPS accretive from year 1

Group financial position remains strong post acquisition: 2022 pro-forma gearing at 29%

PLANET

Accelerating R&D related to the next generation of materials

Increase bio-sourced and recycled materials rate in resins, glues and reinforcements

Comprehensive approach to **reduce VOC emissions and solvent usage in coating processes**

Key takeaways

High-Tech Materials revenue up c.20%, creating a leader in high-tech Engineered Fabrics & Films

Important step to develop Michelin beyond mobility, in line with 2030 ambition to position the Group as a key player in polymer composite solutions

Unlocking deep-innovation synergies in a broad range of products and applications

Enhancing growth profile, EBIT-margin accretive for Group and Specialty segment, positive cash generation and EPS impact

Michelin's strong financial position maintained, delivering long-term value for all stakeholders

APPENDIX

Tire businesses

Michelin uniquely positioned to leverage vehicle electrification

BEV: HIGHLY DEMANDING VEHICLES PERFECTLY FIT WITH MICHELIN'S UNIQUE KNOW-HOW

KEY REQUIREMENTS FOR TIRES

-  Low rolling resistance
-  Silent architecture
-  Low abrasion rate
-  High rim capacity
-  High load capacity

MICHELIN: BEST COMBINATION OF PERFORMANCES

* source: ADAC, March 2022 - Download the ADAC study

OVER-INDEXED IN PREMIUM * BEV

Michelin OE market share

*Premium: Luxury-Premium and Sport-Passion segments

MICHELIN PREFERRED TIREFAKER FOR LEADING EV OEMs

Wear particles: considerable competitive advantage, without any compromise on safety

PARTICLE EMISSIONS: MICHELIN VS. OTHER PREMIUM TIRES MAKERS (1)

Particle per vehicle
unit: g/1,000 km

The environmental impact of tire abrasion is up to 50% higher for other manufacturers than for Michelin, whose tire technology currently gives them an enormous lead over the competition.

[Download the ADAC study](#)

PARTICLE EMISSIONS GET REDUCED WITH EACH NEW RANGE (2)

(1) Tyre wear particles in the environment, ADAC, March 2022 – 100 sizes tested
 (2) DEKRA studies in 2020 (MARK20B, MARK20E) and 2021 (MARK21E)

Tire and road wear particles (TRWP): definition and state of knowledge

SCIENTIFIC STUDIES HAVE STARTED TO MEASURE THE ENVIRONMENTAL IMPACT OF TRWP ⁽¹⁾:

AIR

Studies confirm that TRWP account for only a very small proportion (<1%) of particulate matter pollution

WATER

Studies suggest that most TRWP never reach estuaries.

Michelin is strongly in favor of a regulation that would limit the level of wear particle emissions of all tires worldwide → work in progress with ETRMA⁽²⁾ members in order to :

- define a standardized TRWP emission rate test method
- promote a threshold regulation and eliminate the less performing tires from the market.

(1) TRWP are tiny debris generated by abrasion from a tire's contact with the road surface. This abrasion is caused by the tire's grip and keeps the tire safely on the road. For more information about TRWP, [see the following document](#)

(2) European Tyre & Rubber Manufacturers Association

Beyond Tire

PARTNERING WITH CA FOR VEHICLE FINANCING

April 2023: 30% stake in Watèa capital finalized by Credit Agricole Leasing & Factoring

- Vehicles deconsolidation from balance sheet
- Leveraging CA mobility's commercial platform and expertise in small fleets

- Acceleration in automotive leasing in Europe
- Shared commitment to a decarbonized mobility

APPENDIX

High Tech Materials

High-tech materials: expanding beyond tires by leveraging our expertise and our innovations, from materials to solutions, for highly demanding applications

R&D

- Unique expertise acquired in **tire design & manufacturing**:

- Proficiency in and **materials chemistry and processing**, from components to composites
- Fundamental and applied **research capabilities**
- A wide range of **partnerships to accelerate innovation**

MANUFACTURING

- Ability to **scale up** and reproduce the materials-based solutions developed in the laboratory:

- Proficiency in **industrial processes**

GROWTH STRATEGY

- Organic growth**

- M&A-driven growth**
Features vs. tires:
 - Higher **growth** and **EBIT %**
 - Lower capital intensity

- Joint ventures**

Symbio: fast expansion towards worldwide leadership in light and heavy commercial vehicles

 **Major grants** awarded in Europe (IPCEI *) and in the USA (California)

Fuel cell development leveraging expertise in materials and industrial processes

2014

Michelin stake:
- 47% in 2014
- 100% in 2019

faurecia
inspiring mobility

2019

MAJOR RATINGS

(as of September 30, 2023)

Natural resources and decarbonation: driving up industry standards on product performance

IF THE WORLD WAS DRIVING ON MICHELIN PC/LT TIRES, PER YEAR IT WOULD SAVE...

-620 ⁽¹⁾
thousand tons
of
materials

thanks to **lower abrasion**, while maintaining low rolling resistance and other performance features.

or
2,500 Statues of Liberty

-115 ⁽²⁾
million tons
of
CO₂ emissions

thanks to **lower rolling resistance**, without sacrificing other performance features such as safety and low abrasion.

or
2 years of New York City's CO₂ emissions

TIRE INDUSTRY CO₂ EMISSIONS ARE MOSTLY RELATED TO SCOPE 3 ⁽³⁾
 Illustration: Michelin 2022 CO₂ emissions

(1) Underlying hypothesis: 30% advantage for Michelin vs. competitors in abrasion, as calculated by ADAC - *Tyre wear particles in the environment*, March 2022.
 (2) Estimated impact on scope 3 usage of the tire industry if Michelin's technology was used by all manufacturers in all geographies. Underlying hypothesis: 20% advantage for Michelin vs. competitors in rolling resistance, based on data extrapolated by Michelin.
 (3) See page 166 of the 2022 Universal Registration Document for details.

Michelin has been leading all major innovations in the tire industry

PRODUCT RANGES SUBJECT TO LIFE-CYCLE ANALYSIS

50% IN 2021 ► 100% IN 2025

On the path to full product circularity with 40% sustainable raw materials by 2030, up to 100% by 2050

(1) European project sponsored by Horizon 2020; project number: 82068

(2) Carried out with the support of ADEME.

Michelin 1st manufacturer to design a road-homologated tire with 58% sustainable materials

**ON THE WAY TO OUR "100% SUSTAINABLE TIRES BY 2050" GOAL:
NEW TIRES WITH BREAKTHROUGH TECHNOLOGIES**

(1) Size: 275/70 R22.5 152/149

(2) Size: 235/55R19 105W

Strong commitment to reduce impact of operations on biodiversity and ecosystems

2022 RESULTS, 2030 COMMITMENTS

	2022	2030
RESEARCH & DEVELOPMENT Life Cycle Analysis incl. biodiversity criteria from best methods	At least 75% of new projects	100% of new ranges marketed
RAW MATERIALS Compliance with the Responsible Natural Rubber Policy environmental criteria	Assessment carried out on all subsidiaries and JVs*	80% of the volume used
Evaluation of raw material supplier policies & practices **	Study carried out to identify the raw materials with the greatest impacts ***	80% of suppliers
PRODUCTION SITES Biodiversity plan adapted to local issues	8 sites	100% of industrial sites
No phytosanitary products to maintain green spaces	12 sites	100% of industrial sites

[+ To know more](#)

* Accounts for ~4.5% of the Group's supply
 ** Other than natural rubber
 *** Based on the results of the Science Based Targets for Nature (SBTN) method and the life cycle analyses of raw materials

Sustainable natural rubber by Michelin: driving progress across a fragmented value chain

ID CARD

~90% of Group's supply come from ~2 M farmers with an average farm size of 3 Ha.

Up to 7 middlemen between direct suppliers and smallholders in Asia

~150 direct suppliers

Global presence in Brazil, Indonesia, Thailand & West Africa :

- 85,000 ha. of plantations
- 15 rubber processing plants
- 500,000 tons/year production

GPSNR Founding member
(Global Platform for Sustainable Natural Rubber)

ACCELERATING SUSTAINABILITY ACROSS THE INDUSTRY BY 2025

- **Dedicated roadmap** tracking commitments on zero deforestation, human rights, and farmer empowerment

EXTENDING ASSESSMENTS OF PRACTICES ACROSS THE VALUE CHAIN : 2022 ACHIEVEMENTS

- **Direct suppliers via EcoVadis:** 92% of expenditures assessed, 90% "ESG mature"
- **Indirect suppliers : RubberWayTM app.** deployed at 80% of suppliers (in volume) in 2022

IMPLEMENTING IMPACTFUL PROJECTS

- **Brazil**
 - increase harvest while preserving the forest (6.8 million hectares)* - 3,800 families in Amazonas
- **Indonesia**
 - improve skills of 1,000 smallholders using RubberWayTM app. by 2024 – (with Porsche)
 - East Kalimantan : train 2,000 farmers by 2024
- **Sri Lanka**
 - improve skills & sustainability performance of 6,000 smallholders by 2025, impacting ~30,000 people
- **Thailand**
 - helping 1,000 farmers diversify their income with agroforestry by 2025**
- **West Africa**
 - ~90,000 farmers trained per year

* With WWF

** As part of the Global Platform for Sustainable Natural Rubber (GPSNR)

Reduction of CO₂ emissions, VOC⁽¹⁾ emissions and water withdrawals: 2022 achievements exceeded 2023 ambitions

EXTERNALITY COSTS EVOLUTION

(€ millions)

(1) Volatil Organic Compounds

(2) Inbound and outbound transportation and distribution of natural rubber, semi-finished products and finished product

(3) Corresponds to 2023 target of approximately €300m announced at the CMD on April 8, 2021, adjusted for the ton of CO₂ valued at €120/t

Michelin applies the recommendations of the Task Force on Climate-Related Financial Disclosures (TCFD)

MICHELIN'S ANSWER

See p. 175 of 2022 Universal Registration Document for more details

Detailed information concerning the application of TCFD recommendations may be found in the public answers to the CDP Climate Change 2022 questionnaire (see <https://www.cdp.net/en/responses>).

GOVERNANCE

As part of the Supervisory Board's role of exercising permanent oversight of the Group's management, the CSR Committee began to review the climate strategy and issue recommendations.

STRATEGY

Four climate scenarios comprising narrative descriptions and quantitative socio-economic and physical assumptions were updated, deepened and deployed for use at two levels:

- by the business lines, regional organizations, operating units, corporate departments and other units as part of strategic thinking and ideation exercises,
- by the Group Executive Committee, to compare them to Group strategy and analyze their resilience about climate change and other indirect risks arising from the environmental transition.

RISK MANAGEMENT

In 2021, an initial internal audit of systemic physical risks was performed and the first pilot study of the vulnerability of certain Group operations was completed.

METRICS AND TARGETS

Joining the "Race to Zero" campaign, answering the call to action led by the Science Based Targets initiative (SBTi), the United Nations Global Compact and We Mean Business, by committing to reach net zero emissions by 2050.

Climate strategy structured around transition and adaptation plans, towards Net-Zero emissions by 2050

STRUCTURED AROUND 2 AXES:

- A **TRANSITION plan** including initiatives to decarbonize direct and indirect activities in the value chain (Scopes 1, 2 & 3) and a strategic plan to support a low-carbon economy
- An **ADAPTATION plan** responding to physical impacts of climate change

BASED ON 3 PRINCIPLES:

- **Achieve net-zero emissions by 2050** by fulfilling our external emission reduction commitments by 2030,
- **Identify risks and opportunities** based on climate change scenarios,
- **Transparently disclose information** to our external stakeholders.

2030 environmental ambition: on the path to reach net zero emissions in 2050

Group's ability to have an influence

Sharp reduction in the environmental footprint of our operations

REDUCTION OF THE ENVIRONMENTAL FOOTPRINT OF OUR SITES

ISO14001- certified

(1) MEF: Michelin Environmental Footprint;

(2) i-MEP: industrial-Michelin Environmental Performance; see detailed definition p.152 of the 2022 Universal Registration Document

Universal social protection: since March 2022, deployment of the Michelin One Care Program

ESSENTIAL GUARANTEES IN THREE AREAS

GIVE EMPLOYEES TIME TO WELCOME A NEW CHILD

Compensated at 100%

- **Maternity and adoption leave:**
14 weeks minimum
- **Paternity leave:**
4 weeks minimum

PROTECT THE FAMILY IN CASE OF AN EMPLOYEE'S DEATH

Payment of a death benefit
(for employees with at least one year of base salary)

ENSURE ALL EMPLOYEES AND THEIR FAMILIES CAN ACCESS A HEALTH PROGRAM

Including at least:

- in-patient hospitalization
- maternity care
- out-patient and routine care
- emergency care

AMBITION: 100% of employees covered by the **Michelin One Care Program** by January 1, 2025.

Diversity and inclusion: Progress in every dimension in 2022, demonstrating the Group's commitment

EQUAL OPPORTUNITY

Every employee can develop his/her talents within the company. Michelin pays particular attention to the internal promotion of manufacturing operators.

DISABILITY

Michelin offers career paths to people of all abilities according to its talent development policy.

MULTI-NATIONAL MANAGEMENT

All our host country nationalities and cultures are represented in all corporate functions in the operating regions and at headquarters, in line with the geographical footprint of each business.

GENDER BALANCE

Achieve parity among Group executives and, by 2030, set the gender balance benchmark in our industry.

IDENTITY

All D&I⁽²⁾ aspects, (e.g., age, sexual orientation, ethnicity, religion, etc.) Enable every person to be who they really are and to bring their authentic selves to work.

(1) IMDI Management Index: see definition on p. 215 of the 2022 Universal Registration Document

(2) Diversity and Inclusion

Michelin governance pillars: clear segregation of management and supervisory powers

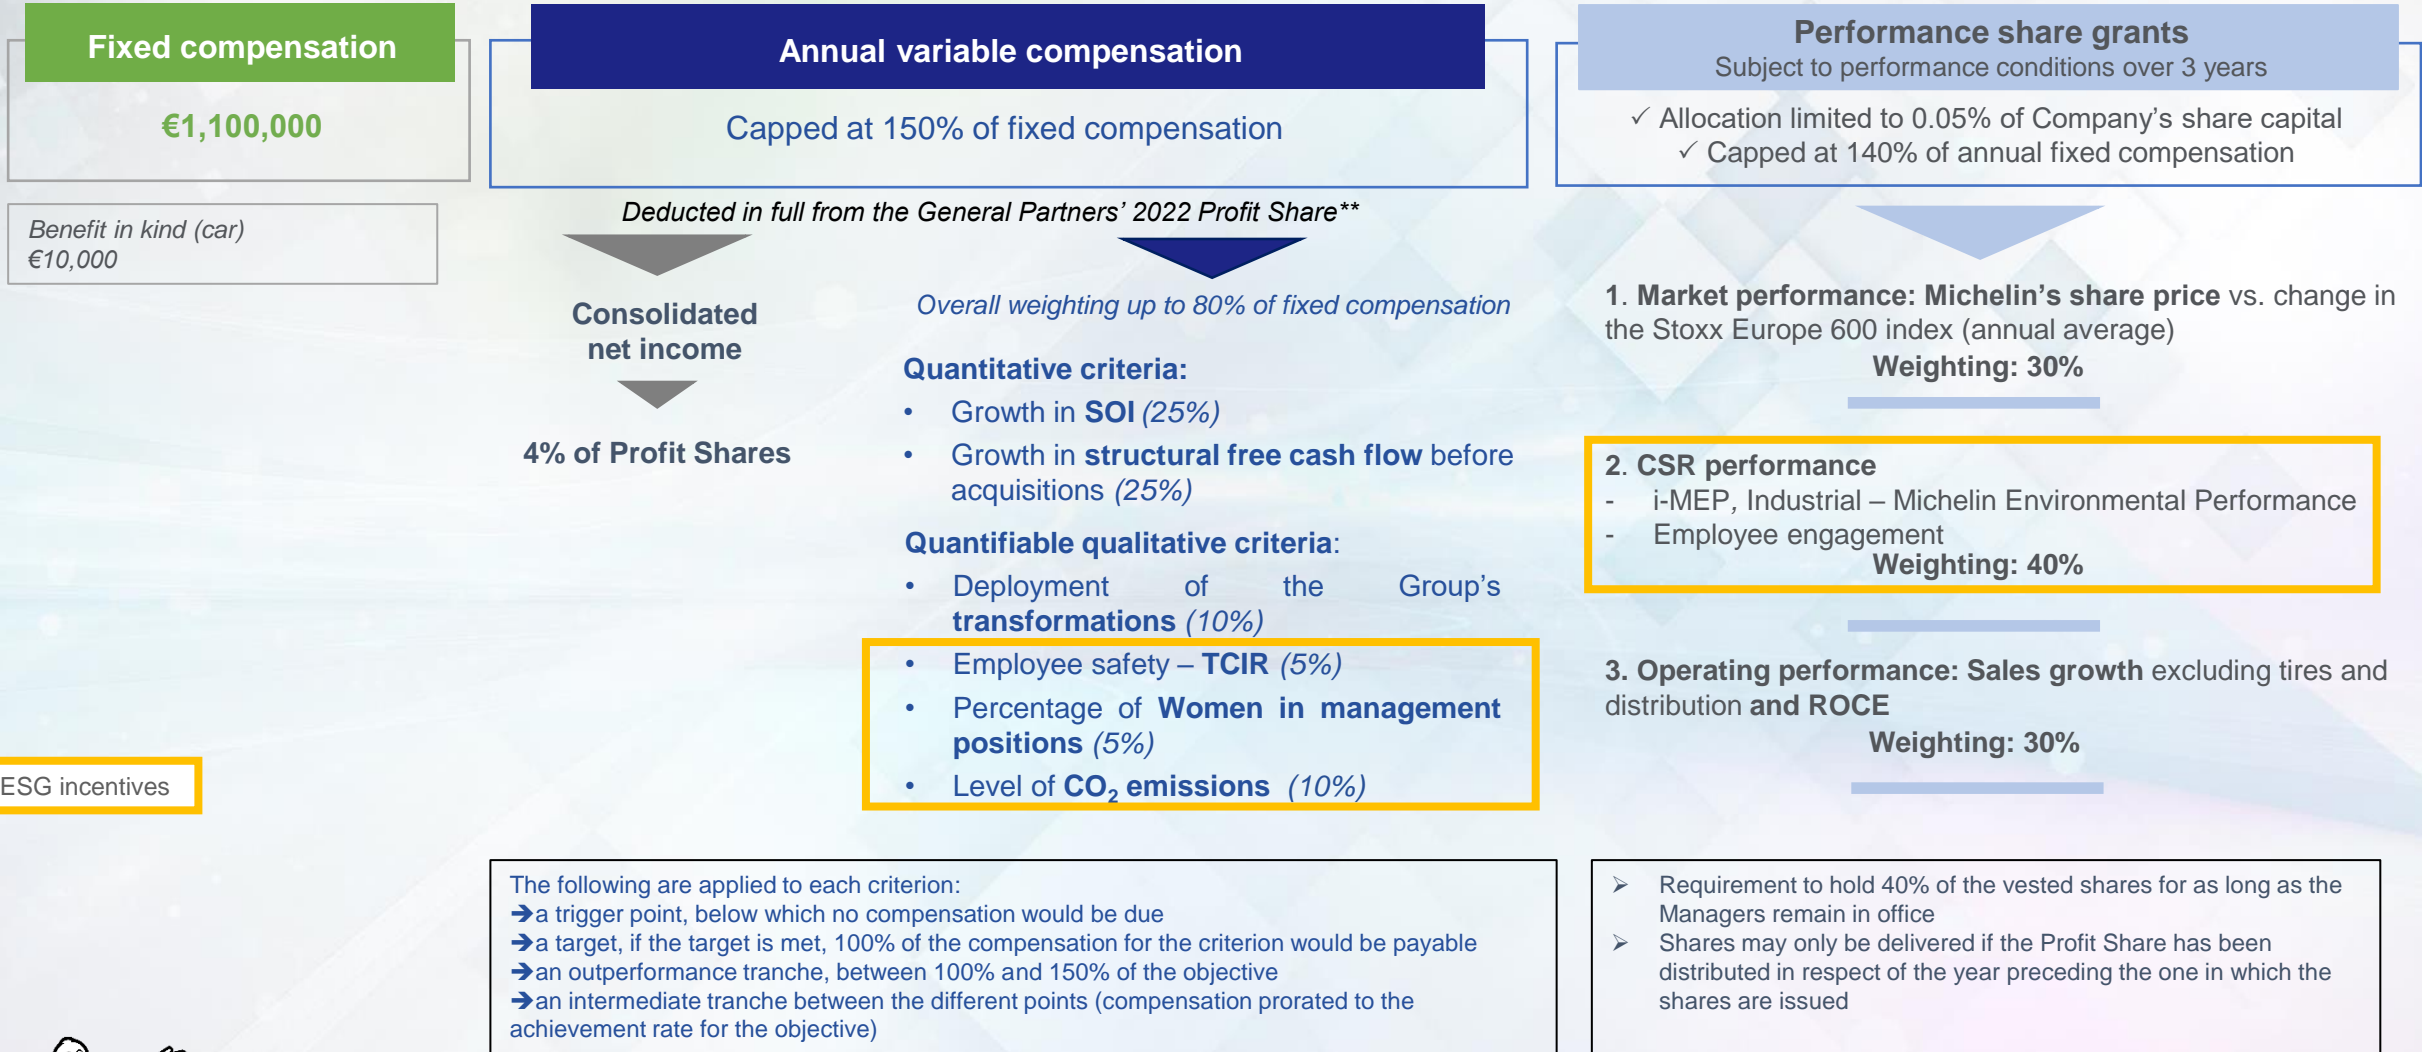

ESG awareness and oversight are fully embodied in Michelin's governance structure

ESG criteria are included in the Managers' compensation and shared with all employees via performance share plans

FLORENT MENEGAUX

Glossary

FREE CASH FLOW (FCF)

Free cash-flow excluding M&A : free cash-flow, which is stated before dividend payments and financing transactions, corresponds to net cash from operating activities less net cash used in investing activities, including JV financing, adjusted for net cash-flows relating to cash management financial assets and borrowing collaterals. M&A-related cash-flows and repayment of IFRS 16 debt are not included.

ROCE

Return on capital employed is measured as follows:

net operating profit after tax (NOPAT) (1), calculated at a standard tax rate of 25%, corresponding to the Group's average effective tax rate; divided by average economic assets employed during the year (2), i.e., all of the Group's intangible assets, property, plant and equipment, loans and deposits, investments in equity-accounted companies, and net working capital requirement.

TIRES SALES

Correspond to sales from Michelin's core business, including the Tire as a Service (TaaS) business and Distribution operations.

NON-TIRE SALES

Correspond to sales from the Services and Solutions (excluding TaaS and Distribution), Conveyor Belts and High-Tech Materials businesses, excluding joint ventures.

(1) NOPAT = Segment operating income + amortization of acquired intangible assets + the Group's share of profit from equity-accounted companies.

(2) Average between the opening and closing balance sheets for the year.

"This presentation is not an offer to purchase or a solicitation to recommend the purchase of Michelin shares. To obtain more detailed information on Michelin, please consult the documents filed in France with Autorité des marchés financiers, which are also available from the [Michelin.com](https://www.michelin.com) website.

This presentation may contain a number of forward-looking statements. Although the Company believes that these statements are based on reasonable assumptions as at the time of publishing this document, they are by nature subject to risks and contingencies liable to translate into a difference between actual data and the forecasts made or inferred by these statements."
