This is our fifth visit to Mandalika, and the circuit remains just as thrilling. Extremely demanding for riders, machines and tire , it features numerous sequences of high-speed corners that will showcase the consistency and versatility of our tires.

We've therefore brought rear tires with reinforced casings to better manage the thermal stresses

However, we'll need to keep a close eye on temperatures: last year, track temperatures reached 60 °C. We've therefore brought rear tires with reinforced casings to better manage the thermal stresses. The compounds remain the same as those used in 2025, when the Soft tire performed well in the Tissot Sprint and the Medium tire proved perfectly suited to the Grand Prix the following day. We are approaching this event with caution and confidence. It will also, as always, be a huge celebration: the Indonesian public's passion for motorbike Grand Prix racing is remarkable, with over 140,000 spectators attending over the whole weekend last year. We are keen to offer them another demonstration of our tires' performance.
